**AGTSI Teams with Eaton on Global Product Distribution for Aero-derivative Market**

In a new agreement with power management company Eaton, Aero-derivative Gas Turbine Support, Inc. (AGTSI) of Boca Raton, Florida, has been selected as Eaton's official global distributor for aero-derivative, industrial and commercial marine engine components and services. Eaton and AGTSI signed the five-year agreement in Jan. after successfully partnering for several years to expand Eaton's worldwide distribution network of aero-derivative gas turbine products. Eaton's products include dynamic and static seals, hoses and fittings, as well as specialty lube system sensors and components. Eaton's product reliability is proven across all gas turbine applications including aerospace, ground based industrial, power-generation and marine propulsion.

"We're building on an established relationship with AGTSI to continue expanding Eaton's presence in the aero-derivative market," said Pat Birch, product line manager for Eaton's Fluid and Electrical Distribution Division, Aerospace Group. "AGTSI is a proven performer and consistently delivers the highest levels of quality and service to Eaton's customers."

"The agreement offers a high-quality, cost-effective solution for Eaton's customers while providing growth opportunities for both companies," said Alan Mibab, owner and president, AGTSI. "AGTSI is well positioned to serve this highly specialized market and maintains a vast inventory of complex products and components manufactured by Eaton. AGTSI also provides operators and repair facilities that specialize in Eaton's marine gas turbines."

AGTSI was established in 2004 and is a global stocking distributor of parts and assemblies for industrial and commercial marine gas turbines. At its headquarters in Boca Raton, Florida, the company maintains an extensive inventory in order to fulfill customers' "just-in-time" requirements. AGTSI also facilitates component overhauls and maintains rotatable exchanges for many of the components.
